
(a) Deployment
Edge: jointly learned frontend
Light vision encoder s
Feature codec
h · Q · rANS
previous codes y_{t-1}
bitstream
Cloud: token decoder
rANS decode
Synthesis g_s (+ state)
previous codes y_{t-1}
visual tokens
SigLIP + proj.
not run in the cloud
VLA policy ($\pi_{0.5}$, frozen)
Action expert
VLM backbone
Tokenizer
language instruction
action chunk
state
(b) Training: policy frozen, only the frontend is updated
frozen
trained
Vision encoder + projection
tokens z
VLA
actions a
rate
token
action
Σ
Jointly learned frontend
tokens ẑ
VLA
actions â
gradients update the frontend only
